

CONTEXT SENSITIVE SOLUTIONS (CSS)

CONTEXT SENSITIVE SOLUTIONS
is a collaborative, interdisciplinary and holistic approach to the development of transportation projects.

CONSENSUS

- When a majority of stakeholders agree on an issue or solution.
- Dissenting stakeholders agree their input has been heard and considered.
- Consensus is **NOT** expected to achieve total agreement from **ALL** parties.
- Consensus does not compromise operations and safety to reach agreement.
- All stakeholders understand transportation agency is the final decision maker.

CONTEXT

- All elements related to the people and place where a project is located.
- Includes visible element such as environmental and historical resources.
- Includes invisible elements such as community values, traditions and/or expectations.
